The 7th European Pediatric GI Motility Meeting will be held in Sorrento from October 1st to 3rd.

This conference is organized almost every two years and covers all the aspects of the pediatric intestinal motility, bringing together a hardworking group of world-renowned experts in the field. A total of 300-400 participants is expected to attend the meeting.

The field of Pediatric Intestinal Motility is still developing with progressive understanding of these common and complex gastrointestinal disorders. The conference will address all the hot topics of intestinal motility including basic and translational science, clinical features, diagnostic techniques and new therapies. This year special issues such as nutritional management and microbiome alterations in motility disorders will be discussed.

Thanks to the members of the Scientific Committee, the meeting will provide the unique opportunity to exchange experiences, discuss new developments and present the most innovative news in the field of Pediatric GI motility. We will try our best to make the journey pleasant and fruitful for delegates and corporate partners.
